DETAILED ACTION

1. This Office Action is in response to Applicant's Patent Application, Serial No. 10/706,931, with a File Date of November 14, 2003.

Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121.
 - I. Claims 1-5, drawn to power supplies, classified in class 363, subclass 23.
 - II. Claim 6, drawn to a Liquid Crystal Display Device, classified in class 345, subclass 87.
3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because each of the subcombination can function as separate and distinct entities, e.g. power supplies can be used in a variety of applications for powering various electrical devices. The subcombination has separate utility such as providing power for variety of devices, such as TV sets and other electronic devices that require electrical power.
4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2629

5. Because these inventions are distinct for the reasons given above and the search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2629
